AUTODESK BIM 360
PLATFORM

Autodesk® BIM 360TM software accelerates project delivery and helps minimize contractor risk with anytime, anywhere access to project data across the entire construction lifecycle. BIM 360 empowers those in the field to anticipate and act, and those in the back office to optimize and manage all aspects of construction performance. It generates alignment between planning and performance, while helping to minimize the risks associated with outdated or inaccurate project data. To learn more about how you can get started with the various BIM 360 solutions, contact your U.S. CAD Account Manager or our team at **info@uscad.com** or call (877) 648-7223.

BIM 360 DOCS

The Autodesk® BIM 360TM Docs web service ensures that the entire construction project team is building from the correct version of documents and plans. Tailored for the needs of the AEC industry, BIM 360 Docs delivers tools for publishing, managing, reviewing, and approving all project plans, models and documents from the earliest phase of a project through owner occupancy. A cloud-based service, accessible at the desktop or mobile devices, BIM 360 Docs delivers anywhere, anytime collaborative access to the entire project team.

BIM 360 BUILD

Autodesk® BIM 360™ Build is field management software for 2D and 3D environments that combines mobile technologies at the point of construction with cloud-based collaboration and reporting. BIM 360 Build puts critical information into the hands of those in the field, helping to measurably improve quality, safety, and commissioning for construction and capital projects of all types.

BIM 360 DESIGN

Autodesk® BIM 360TM Design is a cloud worksharing, design collaboration, and data management product for project delivery, built on the new BIM 360 cloud platform. Made for distributed, multidisciplinary teams, you can co-author Revit models with greater file- and folder-based access controls, issue management, deliverable coordination, change visualization, and unlimited storage.

BIM 360 GLUE

Autodesk® BIM 360™ Glue is a cloud-based BIM management and collaboration product that connects the entire project team and streamlines BIM project workflows. With anywhere, anytime access to the most recent project models and data throughout the project lifecycle, BIM 360 Glue accelerates project reviews and empowers multidisciplinary teams to quickly identify and resolve coordination issues.
