

CADLearning Center for Enterprises

As a secure and comprehensive on-demand learning solution for your organization's Autodesk users, the CADLearning Center allows managers to supplement face-to-face training with online learning and training or replace costly or ineffective alternatives. The CADLearning Center provides a customizable learning environment for your company that can be used for on-demand support and help, for structured and personalized self-paced learning, or as part of a path to Autodesk Certification. The flexible learning tool is available to all employees online, anytime, anywhere and includes CADLearning content to address the needs of various learning styles.

Businesses both large and small can help their Autodesk users build skills and knowledge in the latest design tools with direct access to CADLearning content, including videos, exercise files and assessments. The CADLearning Center enables learning organizers to manage users and the availability of learning and training, including CADLearning content and custom content, user administration and content administration. Reporting and analytics tools provide full control of learning and training with a 360 view of user activity and progress to keep your program on track.

Customizable Learning Environment

- Branding – add your own logo, colors and a unique CADLearning URL
- Re-organize and hide CADLearning content as needed
- Create and upload custom learning content for:
 - Custom workflows
 - Project-based training
 - In-house standards
 - Other software applications
- Manage content availability and display to users only when appropriate
- Identify and bridge skills and knowledge gaps with assessment tools for personalization
- Create custom video playlists based on:
 - Search
 - Quiz Results

Comprehensive Learning and Training

- Use for on-demand support and help or structured and personalized self-paced learning
- Includes top-rated CADLearning content created by subject matter experts
- Direct access to the largest video library for Autodesk software
- Additional content to support video and improve retention
- Diverse content library covering more than 40 Autodesk software applications
- Provide a path for employees to earn Autodesk Certification and industry credentials that win firm recognition
